DIGITAL MARKETING

Boosting Brand Awareness and Engagement:
A Social Media Marketing Strategy Aligned
with Your Business Goals.

⁰¹ High-quality Content Creation

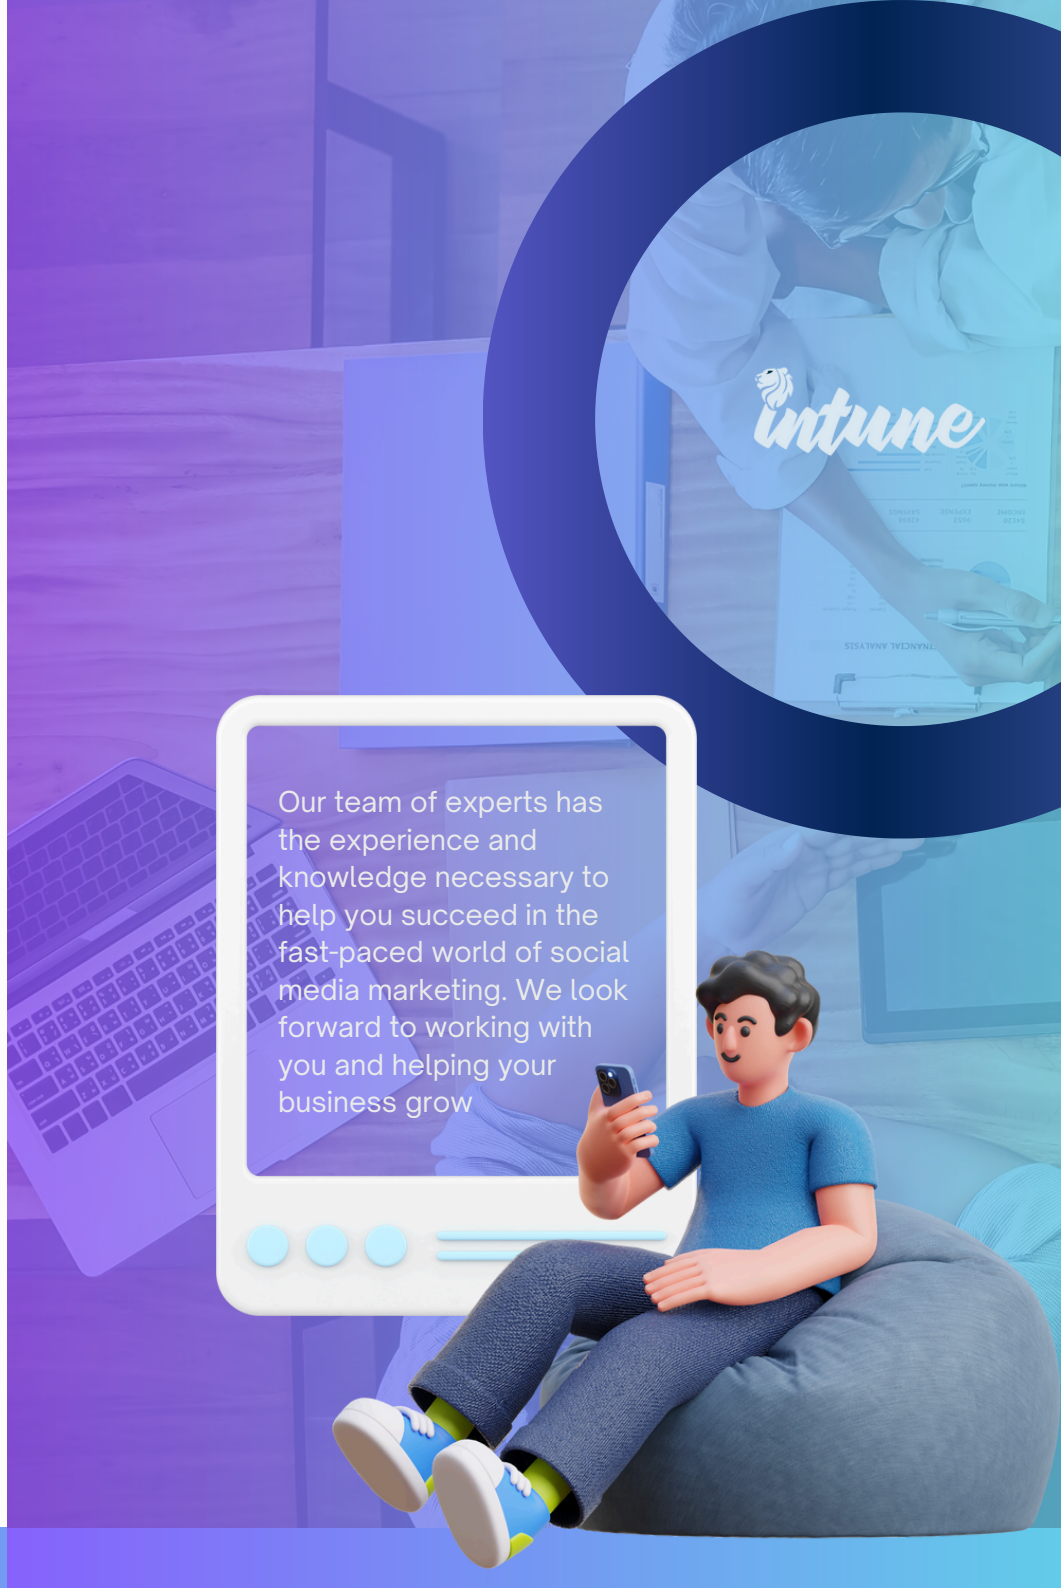

Our team will create and publish 8 posts (2 weekly posts) on Instagram & facebook per month. Each piece of content will be carefully crafted to align with your brand's messaging, target audience, and overall marketing strategy.

⁰² Targeted Organic Growth

We will work to attract and retain new followers on Instagram per month through targeted organic growth strategies. Our goal is to increase your brand's reach and visibility on the platform, while ensuring that your followers are engaged and interested in your content.

⁰³ Real-time Analytics and Support

We will provide you with real-time analytics, so you can make data-driven decisions. Our team will also be available to provide you with seamless support and assistance throughout the entire process

Our team of experts has the experience and knowledge necessary to help you succeed in the fast-paced world of social media marketing. We look forward to working with you and helping your business grow

Delivery Routing System

Powered by

Our IT-driven excellence is backed by our dedicated in-house IT team. We invest in cutting-edge technology and expert professionals to optimize every aspect of Your courier services, ensuring you benefit from the latest innovations:

Transparency: Track and trace deliveries, driver locations, and ETAs in real time, 24/7.

Communication: Send pre-delivery and proof of delivery (POD) notifications to your customers via SMS or email.

Surety: Customer provides electronic signature via PDA on receipt of goods, replacing paper-based proof of delivery and record keeping.

Convenience: Enjoy real-time peace of mind that goods have been delivered, and delivery information is easily retrievable.

Powered by

We invest in cutting-edge technology and expert professionals to optimize every aspect of your courier services, ensuring you benefit from the latest innovations:

1 Optimized Routes

Our advanced routing system is the backbone of our operational efficiency. Meticulously integrated by our IT team, it minimizes delays and reduces transit times. When you choose Cygnus Express, you can expect:

- **Efficient Routing:** Our software calculates the most efficient delivery routes, taking into account factors like traffic, weather, and package size. This ensures your shipments reach their destinations faster.
- **Minimized Delays:** With real-time traffic data and automated route adjustments, we significantly reduce the chances of delays, ensuring your deliveries stay on schedule.

Ease: We schedule your deliveries in advance.

Efficiency: Ensure efficient, cost-effective deliveries.

Surety: Know what order your deliveries will be made in and ETA of goods.

Value: Maximise the effectiveness of vehicles and drivers.

DELIVERY ROUTING

2 Real-time Tracking

Have you ever wanted to know where your delivery or driver is? Our system integrated with Driver app GPS Tracking technology that enables our clients to track and trace the progress of their deliveries and vehicles simply, efficiently and in real time, from pick-up to drop-off.

Clarity: Complete transparency and improved security because you know where your delivery vehicle is at all times.

Monitoring: Track and trace the progress of your deliveries.

3 Driver Management

Efficient driver assignment and performance monitoring are essential components of our IT-powered solutions, overseen by our IT team:

- **Optimized Assignments:** Our system intelligently assigns drivers based on their proximity to pickup locations and delivery destinations, minimizing travel time.
- **Performance Monitoring:** We actively monitor driver performance, ensuring they adhere to delivery schedules and handle parcels with care. This proactive approach enhances reliability and service quality.

4 Data Insights

Data-driven decision-making is at the heart of our IT approach. Our IT team can provide you with valuable insights into your delivery operations through comprehensive reports and analytics:

- **Informed Decision-Making:** Access detailed reports on delivery performance, transit times. These insights empower you to make data-driven decisions, optimizing your logistics strategy.
- **Continuous Improvement:** Our IT team analyzes performance data to identify opportunities for improvement, allowing us to fine-tune our services continually.

1. Onboarding Fee:

- A one-time fee of \$850 is applicable for the onboarding process, covering initial setup and integration.

2. Additional Trucks:

- Occasional additional trucks will not incur extra charges.
- Regular additional trucks will be subject to a different tier of charges.

3. System Subscription:

- The system subscription cost is not included in the onboarding fee.
- Clients may independently purchase the subscription.
- Intune can assist with the purchase, or Subscribe on behalf of the client, with additional charge. Please contact us for assistance or pricing details.

OFFICE BACKEND SOLUTION

for **Tradies**

Do you want to automate your daily tasks?

Our automation expertise can automate key processes like invoice processing, data entry, and document routing. Imagine never manually uploading another customer record!

Say goodbye to missed appointments and forgotten deadlines!

Enhance customer experience with our reliable SMS notification services. Track orders, remind clients of appointments, and send timely updates – all with seamless integration into your workflow.

Is remembering and managing a customer growing challenge?

Our robust CRM solutions streamline lead generation, track customer interactions, data and provide valuable insights to optimize your marketing and sales efforts.

Never miss an important call again!

Get a dedicated VoIP phone number with IVR for professional call handling. We can even man the phones when you're unavailable and deliver detailed call summaries for optimal follow-up.

Need a dedicated virtual assistant to handle the nitty-gritty?

Our expert customer management services free you from administrative burdens. We handle business support calls, prepare proposals, documents and tender services (seamlessly navigate tender processes with our expert assistance, ensuring your business stands out in competitive bids.) – empowering you to focus on strategic initiatives.

PBX SOLUTION

‘Hosted PBX’ is used to describe a phone system that is hosted in the cloud (or Internet) and works via VoIP (Voice Over Internet Protocol).

Some benefits of Hosted PBX include being location independent, not needing equipment, and being easy to manage. Add and remove phones when required, with minimal configuration. Hosted PBX offers a significantly richer feature set compared to older on-premise deployments.
